EI
11. A data cable having a plurality of twisted pair conductors and an interior support comprising:
- a longitudinally extending central portion forming a portion of said support;
 - a plurality of projections radially extending from said central portion;
 - each projection of said plurality of projections being adjacent to two other projections of said plurality of projections, said plurality of projections forming a plurality of adjacent projections;
 - a different passage defined by each of said plurality of adjacent projections;
 - only one twisted pair conductor from said plurality of twisted pair conductors disposed in each different passage defined by each of said plurality of adjacent splines;
 - each twisted pair conductor having a first insulated electrical conductor and a second insulated electrical conductor, said first and second insulated conductors twisted about each other to form a twisted pair.
12. The cable of claim 11 wherein said passage is a passage selected from a group consisting of a channel, a groove, and a duct.
13. The cable of claim 11 wherein said projection is a projection selected from a group consisting of a prong, a spline, and an arm.
